

Algebra 1 & Algebra 2 Classes

How much are Algebra 1 and Algebra 2 classes?

\$10 per month from August through April, with a \$50 registration fee (non-refundable).

What makes Scott Clifton qualified to teach math?

Scott has tutored math or taught math classes for over 30 years, beginning in high school. He has been blessed with abilities in math since childhood, including an aptitude for mental calculations involving multiplying, dividing, fractions, and percentages. As a sixth grader, Scott's score on a statewide math test was the highest in the county, and 17th in the state. As a seventh grader, he was awarded the "Top Math Student" award at Wake Forest-Rolesville Middle School in Wake Forest. In high school, Scott scored a 700 on the math section of the SAT, which contributed to his being offered a full, four-year academic scholarship for college.

How do the math classes work?

Classes are recorded videos, which families will have access to. Students will get a thorough explanation of each lesson, with lots of tips and tricks, as well as practice problems worked out.

The whole focus on the lesson videos is to make each lesson as clear and easy as possible for students!

Students complete at home assignments related to that week's lessons.

All math classes are designed to supplement the efforts of parents who are homeschooling their high school children and are not in any way intended to replace the homeschooling parent, who is, of course, the primary teacher of a homeschooled child.

The math videos are intended to help students have some fun and laugh, to break up any potential tension felt by kids who are intimidated by math!

Which math program do you use?

All classes use the Saxon Math program. Parents need to buy the following for their math student:

- a third edition textbook
- a solutions manual
- test forms and worksheets (if you want your student to do testing at home)

The above three elements are often bundled together in something called a "home school kit," which you can buy at many online stores such as www.rainbowresource.com or www.christianbook.com.
